Why can’t users create their own agents?

For administrators and leaders · https://cogniti.ai/docs/why-cant-users-create-their-own-agents/

To create an agent within an organisation, the organisation needs to have the appropriate AI access keys enabled, and users need to be allocated agent quota.

If a user sees the 'Create agent' button disabled, it means that this configuration has not been completed yet:

To set up the AI access keys: How do I set my organisation’s API keys?

To allocate agent quota for users: How do I allow users to create their own agents?
