How do I set the language that Cogniti uses?

Getting started · https://cogniti.ai/docs/how-do-i-set-the-language-that-cogniti-uses/

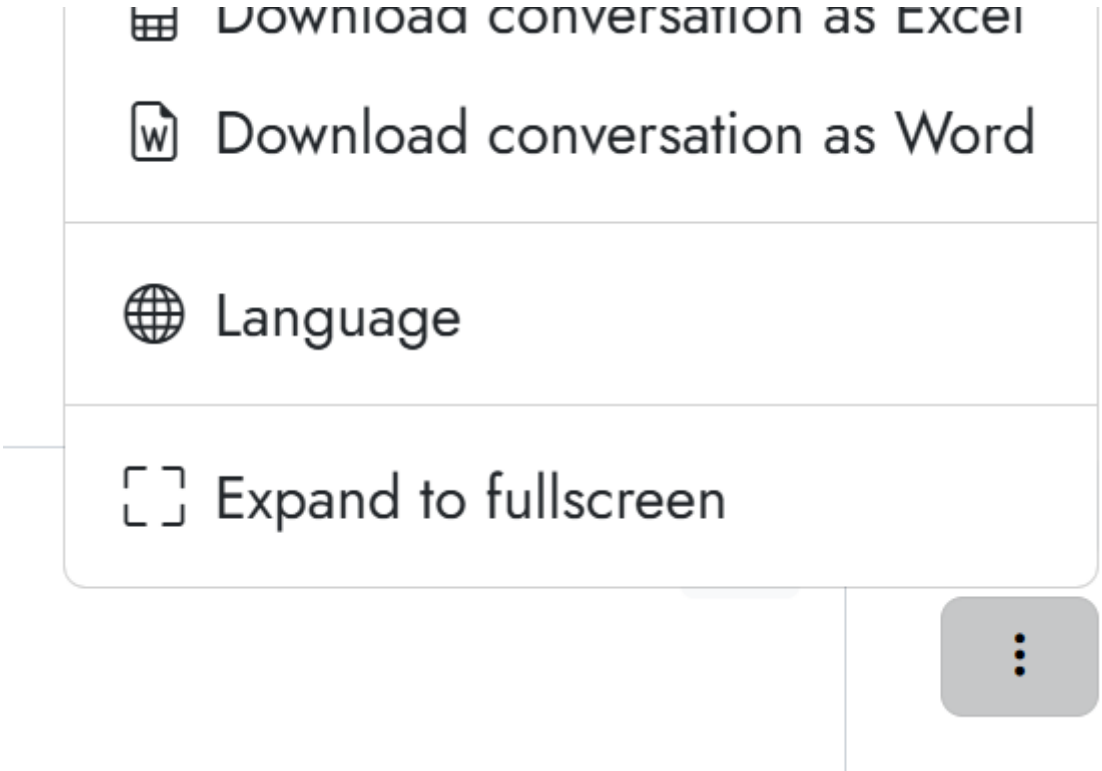

Cogniti supports internationalisation into a number of languages for its interface.

Its AI agents also support over 100 languages.

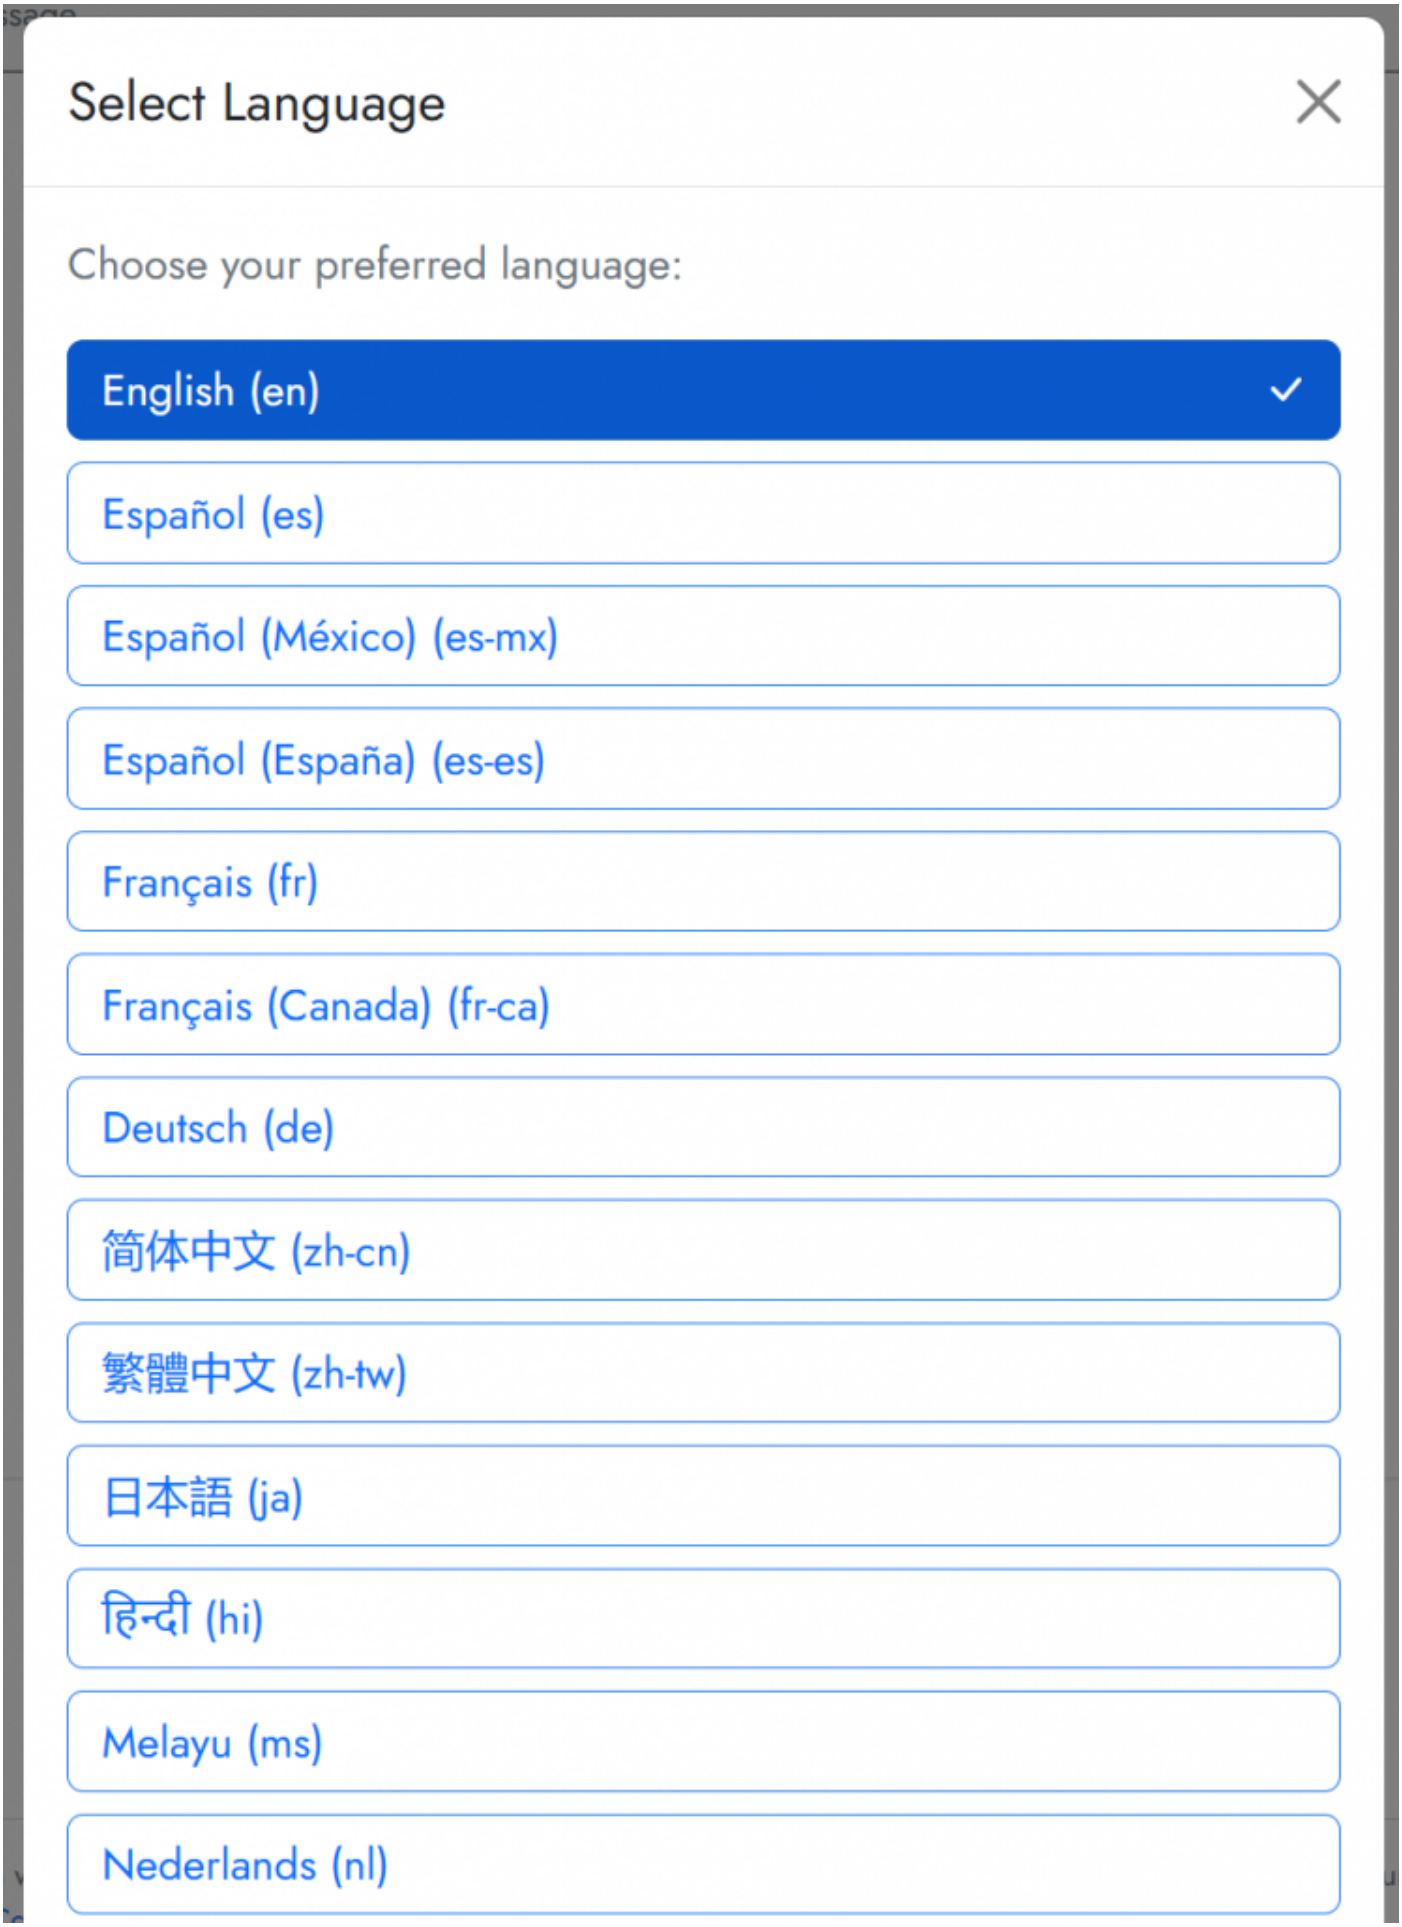

Setting the interface language

When chatting with an agent

When chatting with an agent, click the three dot ('kebab') menu in the bottom right next to the chat box. Select the *Language* menu option.

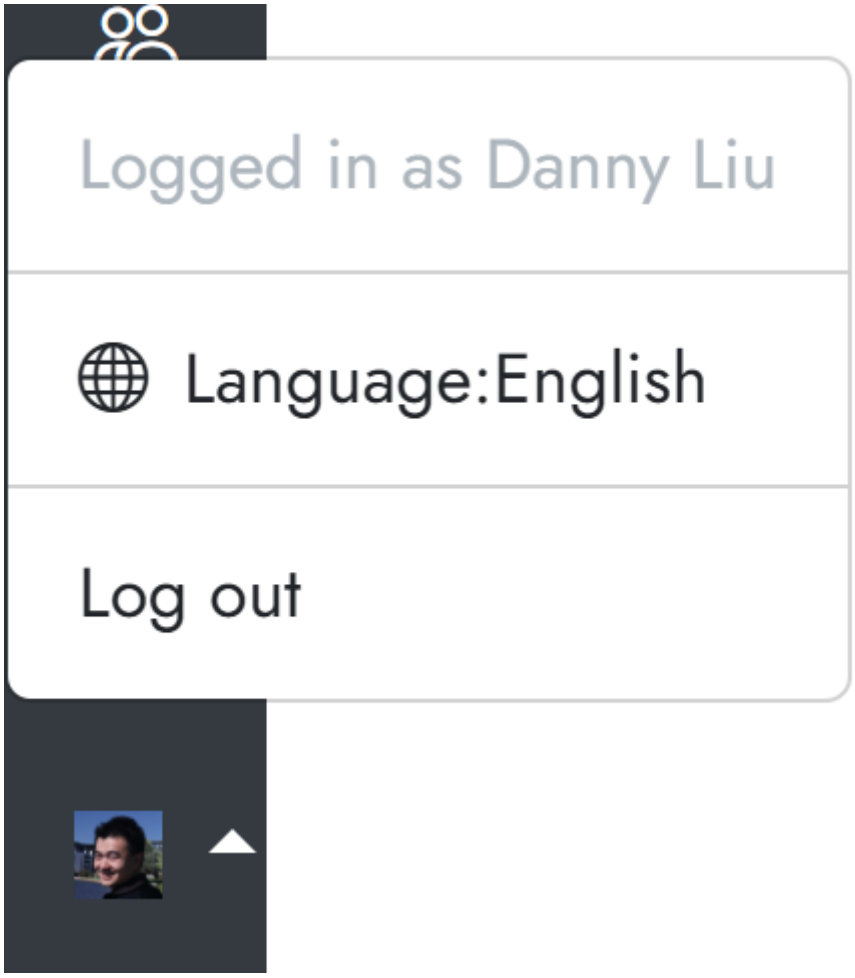

Pick a language from the language selector that pops up. Depending on your organisation's settings, you may only have a subset of languages available. Once you click on an option, the interface will refresh and update.

Select Language
Choose your preferred language:
English (en)
Español (es)
Español (México) (es-mx)
Español (España) (es-es)
Français (fr)
Français (Canada) (fr-ca)
Deutsch (de)
简体中文 (zh-cn)
繁體中文 (zh-tw)
日本語 (ja)
हिन्दी (hi)
Melayu (ms)
Nederlands (nl)

When logged into Cogniti independently

Once logged in, click on your user icon in the bottom left and click the *Language* menu option.

Pick a language from the language selector that pops up. Depending on your organisation's settings, you may only have a subset of languages available.
